

Power-Stain™ 1-Step Polymer Double Stain Kits

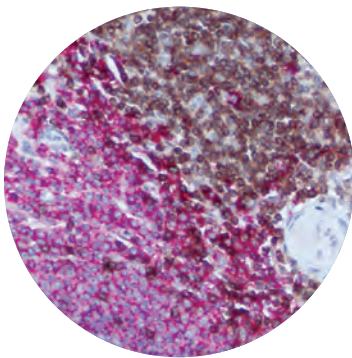

Overview

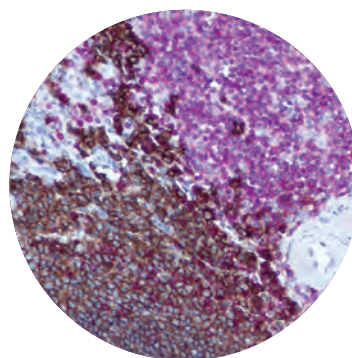

Genemed's new Power-Stain™ 1.0 Polymer Double Stain Kits provides a simple and fast way for multicolor Immunohistochemistry staining. The high-performance kits provide information about co-expression of different biomarkers in one slide: Presence of two or more biomarkers in one cell's different cellular compartments or presence of two or more biomarkers in different cells.

Benefits

- Greater context for diagnosis with multicolor chromogens
- Fast 1-step 15 minute incubation time
- Easy integration into daily routine
- Compatible with primary mouse and rabbit antibody cocktail
- Ideal for human FFPE tissue section
