

Tween 20 (50%)

<u>Cat No.</u>	<u>Quantity</u>
10-0031	15 mL

Intended Use

For In Vitro Diagnostic Use Only.

This product is intended to be diluted and used for reducing non-specific binding in immunoassay, e.g. immunohistochemical (IHC) and enzyme-linked immunosorbent assay (ELISA) procedures.

Reagents Supplied

One 15 mL dropper bottle of 50% Tween 20.

Procedure

Dilute according to specific requirement, e.g. 1:1000 with Phosphate or Tris buffered saline for final concentration of 0.05% before use (for convenient application, use one drop (25 µl) for 25 mL of buffer).

Storage

Store at room temperature.

All performance claims are void after the expiration date.

Material Required But Not Supplied

Phosphate or Tris buffered saline (PBS or TBS)

Precautions

For professional users only.
