

Non-Immune Mouse Immunoglobulin

60-0045 6 mL Non-Immune Mouse Immunoglobulin, Ready-To-Use
Concentration: See container label

Intended Use	For In Vitro Diagnostic Use. This product is intended to be used in normal and neoplastic formalin fixed paraffin embedded (FFPE) tissue sections in immunohistochemical (IHC) detection methodology. Interpretation must be made within the context of the patient's clinical history and other diagnostic test by a qualified pathologist.
Description	This non-immune mouse immunoglobulin is derived from non-immune mice and has no known specificity. The concentration of mouse immunoglobulin in this reagent is similar to that of many primary mouse antibodies used for immunohistostaining. No background or specific staining was observed when tested on human tissues using Genemed Acu-Stain™ HRP Detection Kits. This product may be used as a negative control for qualitative assessment of background staining for primary mouse antibodies in IHC staining of sections of routine FFPE human tissue.
Reagent provided	This product contains 1 µg/mL of normal (non-immune) mouse immunoglobulin diluted in 10 mM phosphate buffered saline (PBS), pH 7.2 containing 1% bovine serum albumin (BSA) and 0.09% sodium azide (NaN ₃) as antimicrobial agent.
Precautions	For professional users. Proper handling of this product as with any product derived from biological sources according to local and applicable regulations. Sodium azide is a toxic chemical. The concentration in this product is not classified as hazardous, however, the build-ups of NaN ₃ may react with lead and copper plumbing to form highly explosive metal azides. Flush the disposed reagent with large volume of water to prevent azide build-up.
Usage	
Dilution	60-0045: Ready-To-Use
Staining procedure	Incubate this non-immune mouse antibody with tissue section for 30-60 minutes at room temperature. Follow the instructions from the selected detection system.
Epitope retrieval:	Use the same condition as mouse primary antibody under testing.
Staining pattern	No staining
Storage	Store at 2-8°C.
